EXPERIENCE

Event Farm Test Drove the rearchitecture of the API codebase, decoupling the app from a CakePHP 2.x to a custom app built using CQS principles that maintains over 85% code coverage.
Software Engineer
Feb 2016 - Present

Headed the custom integrations between Event Farm and Salesforce, a market leading integration between the two platforms. A custom PHP Salesforce Rest API Solution was built for the integrations and has been open sourced and made available on Github.

Created auto generating API Client Libraries (SDK's) for the Event Farm API in PHP, JavaScript, TypeScript, Python, and assisted with Swift.

Web Services LLC Led development of AdStat.io, utilizing Laravel, MySQL, MongoDB, JavaScript, jQuery, HTML and CSS; Git.
Full Stack Web Developer
June 2014 - Oct 2015

Updated and optimized existing projects in PHP MVC frameworks including Laravel, Code Igniter, and CakePHP.

Maintained LAMP stack on a CentOS dedicated private server receiving anywhere from 10,000 to 1,000,000 daily requests.

Digital Canvas Design LLC Develops and manages hosting environment on custom VPS using Docker to serve a variety of projects from custom web applications to blogs.
Owner, Software Developer
Jan 2014 - Present

Freelancer Constructed web applications for clients. Most built in PHP + MySQL in varying degrees of complexity, as well as some simple static HTML + CSS websites along the way.
Aug 2008 - Dec 2013

Ace Printing & Graphics Designed and created graphics for banners, billboards, logos, and websites while communicating with clients to create projects from concept to finished, printed works.
Graphic Designer
May 2011 - Dec 2013

Built six custom workstations. Three that served as graphic editing stations, two print servers and one accounting station.

Florida Sea Grant Collaborated on a small team authoring a PHP based interactive survey using the Google Maps API to gather PhD thesis research data on the Sarasota Bay and the Ace Basin.L
Web Developer
Jan 2012 - July 2012
